150 YEARS OPTIBELT

Take a look at OAP's 150th Anniversary congratulations Video on our Youtube Channel.

INNER VALUE MATTER THE MOST

Depending on whether it's a V-belt for a Porsche or a solution for the cement industry, the requirements for a Porsche or a solution for the cement industry varies greatly between industries.

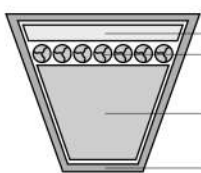

For example, in the automotive industry the focus is on achieving more power with a smaller capacity, as the design of the engines is becoming more and more compact.

Whereas, in the world's largest rock crushing plant on the island of Gotland in Sweden. The size and extreme power are the most important factor.

In the plant, 64 belts that are each 12 meters long, have to run at an absolutely constant rate in order to reliably convey 2,000 tons of stone every hour.

OPTIBELT can develop drive solutions for every conceivable industry in which power is transmitted via belts. For just 2014 alone, we are talking about 66,666 different drive belts. That is how large our belt range is.

1948
optibelt SK
V-belt

Cable cord rubber
age
Rubber core
Wrapping fabric

2012
optibelt SUPER-E-POWER
flank open V-belt from
EPDM

Woven fabric
low-stretch polyester
cord
EPDM embedding
compound
EPDM compound with
transverse fibers
Molded serrations

optimierte Zahnform
aus Polyurethanmischung
Carboncord

OPTIBELT ASIA PACIFIC

2022 ONLINE SEMINARS

BUILDING BLOCKS OF YOUR SUCCESS

The Optibelt seminars are aimed at both NEW and EXPERIENCED customers in the trade. Below are the seminars topics that we will be exploring in 2022. The seminars do not build upon each other and can therefore be visited individually, depending on your interest.

Module 1: Our product range

27th June 2022

1500 Hours – 1600 Hours

Module 2: Drive Calculation & CAD Service Tool

25th July 2022

1500 Hours – 1600 Hours

Module 3: Maintenance & Installation

29th August 2022

1500 Hours – 1600 Hours

Module 4: Errors & Remedies

26 September 2022

1500 Hours – 1600 Hours
